A NOTE FROM US

It's difficult to put into words the profoundly life-changing experience of surviving a wildfire. After the flames are out, the road to recovery is about more than filing claims, calls with agencies, clean-up, and what will feel like a never-ending to-do list. It's about the emotional healing of accepting what was lost, forgiving yourself for what you wish you would have done, and remember to have faith again in the future ahead. The smiles will eventually outweigh the tears—you'll emerge stronger and be amazed by your resilience.

No two recovery journeys are the same, and each present unique circumstances. CSU Extension has gathered a variety of resources based on insights from subject matter experts and survivors to provide guidance on the road to recovery. We hope you find this toolkit useful as you embark on the journey ahead.

**COLORADO STATE UNIVERSITY
EXTENSION**

ACKNOWLEDGEMENTS

This toolkit would not have been possible without contributions from experts at Colorado State University Extension, Colorado State Forest Service, CSU's College of Veterinary Medicine and Biomedical Sciences, Warner College of Natural Resources, Mesa County, and Jefferson County. We would like to extend a special thank you to landowners impacted by the Pine Gulch and Cameron Peak Fires for sharing their recovery journey. Thank you to all who contributed.

ACRONYMS

Listed below are some of the common acronyms and their meaning that are used throughout this guidebook and throughout post-fire recovery.

Acronym	Definition
BAER	Burned Area Emergency Response
BLM	Bureau of Land Management
CDA	Colorado Department of Agriculture
CDPHE	Colorado Department of Public Health and Environment
CSFS	Colorado State Forest Service
CSU	Colorado State University
DOI	Division of Insurance
DOLA	Division of Local Affairs
DOR	Department of Revenue
DORA	Department of Regulatory Agencies
EPA	Environmental Protection Agency
EWP	Emergency Watershed Protection
FEMA	Federal Emergency Management Agency
FSA	Farm Service Agency
GIS	Geographic Information Systems
IRS	Internal Revenue Service
JCPH	Jefferson County Public Health
JCSO	Jefferson County Sheriff Office
JEFFCO	Jefferson County (<i>abbreviation</i>)
NAMI	National Alliance for Mental Illness
NOAA	National Oceanic and Atmospheric Administration
NRCS	Natural Resources Conservation Service
NWR	NOAA Weather Radio
NWS	National Weather Service
OEM	Office of Emergency Management
RMIIA	Rocky Mountain Insurance Information Association
SRFSN	Southern Rockies Fire Science Network
USDA	United States Department of Agriculture
USFS	United States Forest Service
WAVE	Watershed Assessment and Vulnerability Evaluation

IMMEDIATE SAFETY

LET OTHERS KNOW YOU'RE SAFE

Whether it's through phone or a designated meeting place, notify family or friends that you're safe.

CHECK IN AT JEFFERSON COUNTY'S EVACUATION CENTER

Stopping at the evacuation center is another good way to let others know you're safe and could prevent firefighters from risking their lives looking for you and your family. It's also a way to connect with law enforcement, local and county administration, community organizations, and other survivors that may be there. It gives some survivors solace to know that there are people and resources ready to assist.

WAIT UNTIL AUTHORITIES SAY IT'S SAFE TO RETURN

Returning to the scene puts you and others in danger, as well as obstructing firefighting efforts. The behavior of fires is always changing and if conditions change, no one may know if you're there. People can be evacuated more than once in the same fire event; repeated returns and evacuations present challenges for emergency responders.

KNOW WHEN TO CALL 911

If you feel that you are in immediate danger, call 911. For updates on the fire, sign up for text or email emergency alerts from Jefferson County Sheriff's Office. During an active fire, the InciWeb Incident Information System will have details and fire maps that are regularly updated. This information is often more reliable than local news because it is managed by a fire communication specialist.

LIMIT WILDFIRE SMOKE EXPOSURE

Wildfire smoke harms healthy people, those with pre-existing health conditions, livestock, and pets. To reduce exposure to smoke, keep an eye on air quality reports from Jefferson County Public Health or EPA AirNow.

It is recommended to use tight fitting N95 style masks to control particle exposure during a fire event. If nearby a fire event, HEPA grade portable air filters and/or highest grade recommended by manufacture for HVAC systems are recommended to control exposure in a residence.

KEEP UP WITH CURRENT WEATHER CONDITIONS

The NWS Forecast Office in Boulder provides active alerts on weather in the region. This office also operates transmitters for NOAA Weather Radios for the area by providing 24/7 information on watches, warnings, and advisories. Another resource is Jeffco WeatherSTEM Portal.

COMMUNICATION

STARTING A RECOVERY NOTEBOOK

As soon as you've reached safety and notified family, friends, and local authorities that you're safe, it's time to start making phone calls to insurance, lenders, utilities, and other companies. As you're making phone calls, there are several details and dates to remember. Starting a recovery notebook to jot down details and keep track of paperwork can help you stay organized throughout recovery. When you're able, you'll want to get a notebook, folders, and pens but until then, we've included the template below and call list on the next page to help get your recovery notebook started.

FIRE (OR EVENT) INFORMATION

Fire or event name: _____

Incident number (if assigned): _____

Date of evacuation: _____

Date of loss (i.e., date home or land burned): _____

Notes and other information:

This image shows a single sheet of white paper with horizontal blue ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

PHONE CALL CHECKLIST

Below is a suggested list of calls to make after evacuation based on what best fits your situation. Don't forget to take notes and feel free to add your own calls or to-dos on the right.

☐ Insurance Company

Give your insurance company as much information as you have even if you don't know the outcome of your home and land. Make sure they know the best way to reach you and you, them. This may be a good time to inquire about your policy and the next steps in the claims process. See the *Insurance, Finance, and Important Documents* section for a list of frequently asked questions for insurance representatives that you may find useful.

☐ Mortgage Company

If you have a mortgage on your home or land, you'll want to contact your lender's loss mitigation department and explain what has happened. As with the insurance company call, make sure you know the best way to reach each other as the situation progresses.

☐ Banks & Credit Card Companies

Call your bank and credit card companies to let them know what's going on. As you're buying replacement items that your bank or credit card company thinks you already own, it may trigger a fraud alert on your account(s).

☐ Post Office

With your mail, you have a few different options depending on what works best for you. You can request a mail hold for USPS to hold your mail for up to 30 days at usps.com or by calling **800-275-8777**. After 30 days you can have your mail forwarded to another address or you can get a P.O. Box.

☐ Doctor and/or Health Insurance

If any medications or supplies were left behind that will need to be replaced immediately, call to see if you are able to get replacements ASAP.

☐ Service Providers (utilities, electricity, gas, water, garbage, internet, etc.)

Notify your home service providers on the situation so that service can be paused or shut off for the time being. Double check to make sure that your automatic payments are also paused so you aren't paying for services you won't use for a while.

MENTAL HEALTH AND SELF CARE

Disasters typically bring about feelings such as fear, shock, disbelief, grief, anger, and feelings of guilt. Memory loss, anxiety, depression, and flashbacks are all common occurrences. Many people have trouble concentrating, thinking clearly, or sleeping. Linda Masterson, author of *Surviving Wildfire*, and 2011 Crystal Fire survivor shares tips from experts and her own experience on taking care of yourself and your family during disaster recovery.

It's okay to not be okay

Allow yourself to recognize your own feelings and be patient with the changes in your emotional state. This is a difficult time, and you don't have to put on an about-face. No one is perfectly fine after experiencing a wildfire.

Rest and sleep

Sleep deprivation can interfere with your ability to function and make decisions. Try to get as much rest and sleep as you can. Relaxation techniques such as meditation or deep breathing may help if you have ongoing difficulties with sleep. Also avoid working on your claim or watching the news right before bed.

Arrange professional counseling

The Red Cross, Colorado 211, or your primary care doctor can connect you and your family to professionals who specialize in disaster related stress. Most health insurance plans, or employee assistance programs can help cover mental health or psychiatric care.

Engage in healthy behaviors

Eating well and getting some exercise will help you feel better and make your brain work better. Staying hydrated is also important as dehydration can worsen symptoms you may already be experiencing. Also limit or avoid alcohol as it can interfere with your sleep and ability to cope.

Stay connected

Social support is crucial to disaster recovery. Staying connected to your family, friends, neighbors, fellow survivors, and any other support network is helpful as you work through recovery.

Establish or reestablish routines

This can include eating meals at set times, sleeping and waking on a set schedule, or sticking to a workout routine. Include some positive routines, such as taking a walk or reading a good book, to give yourself something to look forward to during these trying times.

Monitor and limit media exposure

During disasters, the non-stop TV, radio, internet, and social media coverage can make things worse. Unfortunately, all of the news may not be completely accurate, which can add to your stress. As compelled as you may feel to follow all of it, try to stick to the daily official briefings.

“

I WAS SUPPOSED TO BE A ROCK, BUT INSIDE I WAS CRUMBLING.

When I reached out, I was seconds away from ending my life. Financially, things on our ranch were falling apart—and I felt like a failure. I didn't want my problems to burden anyone else, so I buried 'em inside. And that's what almost buried me. Thankfully, I picked up my phone and called Colorado Crisis Services. I was able to finally get out everything I'd been holding inside, and I realized that trying to be a rock of strength for everyone else had actually caused me to start crumbling inside.

No matter what you're going through, you don't have to go through it alone.

“Whatever the news, no matter how bad or good it may be, there can be no next steps until you know what you’re dealing with.” -Linda Masterson, Surviving Wildfire

Although the flames are out, unfortunately, there are dangers that remain. Some hazards that may exist include flash flooding, structural damage, unstable roads, weakened trees, hot spots, or wildlife predators that have moved into the area. Survivors recommend making an initial trip to assess the extent of damage, post-fire hazards, and plan for restoration tasks that need to be accomplished first, before beginning clean-up or returning home.

Regardless of the extent of the fire damage to your home or land, returning after the fire will be an emotional experience. For the first viewing and initial assessment, you’ll want to make sure to bring a camera, notepad, and box of tissues. The first steps to recovery will start with assessing and documenting your losses. **Be sure to take plenty of pictures and notes before moving anything around.** If your adjustor is coming with you, take good notes of your conversation.

Also wait to bring back pets and livestock from their evacuation location until you know the extent of damage and hazards that may exist such as, downed fences, hot spots, or predators that may have moved into the area. The following pages include re-entry safety tips and a post-fire supply list.

POST-FIRE SUPPLY LIST

Below is a suggested list of supplies to grab before you go out to view your property. Feel free to adapt this list based on your situation or add other items on the right.

Attire

- ☐ Sturdy, close-toed shoes
- ☐ Work gloves
- ☐ Long sleeves and pants you don't mind getting dirty
- ☐ Masks (N-95 or P-100 rated)
- ☐ Hard hat

Supplies for documenting damage

- ☐ Camera (cell phone camera will do)
- ☐ File folders
- ☐ Pens
- ☐ Highlighters
- ☐ Post-it notes
- ☐ Laptop

Cleaning supplies

- ☐ Heavy duty trash bags
- ☐ Household cleaner
- ☐ Bucket
- ☐ Bleach
- ☐ Dish soap
- ☐ Cleaning towels and rags
- ☐ Vacuum with HEPA filter
- ☐ Tarps
- ☐ Broom
- ☐ Rake

First aid supplies

- ☐ Battery powered radio (for updates and weather reports)
- ☐ Batteries
- ☐ Adhesive bandages
- ☐ Sterile gloves
- ☐ Ointment (antibiotic and burn)
- ☐ Pain reliever
- ☐ Soap
- ☐ Sunscreen
- ☐ Insect repellent with DEET
- ☐ Thermometer
- ☐ Antibiotic wipes
- ☐ Alcohol-based hand sanitizer

Snacks and water

- ☐ Non-perishable snacks (e.g., granola bars, crackers, jerky)
- ☐ Bottled or gallons of water

SAFETY TIPS FOR RETURNING

When you are given approval by a fire authority to return to your property, keep the following safety tips in mind as you re-enter.

KEEP AN EYE (OR EAR) ON THE WEATHER

When rain falls over a burned area upstream of your location after a wildfire, flash flooding can occur. Avoid burned areas, storm drains and natural drainages. Keep a NOAA weather radio handy for emergency updates, weather, and news reports.

USE CAUTION AND GOOD JUDGMENT

Smoke, sparks, ash pits, hot spots, or hidden embers should be avoided. Deeply charred or smoking trees, poles, and wires on the ground are dangerous. If another fire or emergency occurs while assessing damage, call 911.

DRIVING & WALKING THE PROPERTY

Watch for downed or unstable trees, brush, rocks, and utility poles. Roads may also have debris or damage. Take a walk around the property to find hotspots and downed fences to help keep pets and livestock safe.

ARRIVING AT YOUR HOME

Prior to returning, check in with your local fire authority to make sure it's safe to return. Be wary of structural instability and hot embers. Check gutters, roofs, overhangs, decks, and wood/debris piles for embers. Look for any hot embers in attics, crawl spaces, or vents.

CHECK FOR UTILITY DAMAGE

Before using any utilities, lines, meters, or propane tanks should be inspected by a professional for damage. Call your service provider to see if their technicians have already come to your property to inspect your utilities or see if an appointment needs to be scheduled.

ASSESSING YOUR WATER & SEPTIC SYSTEM

Before using a private well, it should be inspected for damage. Depending on the damage, a well technician may be needed. The fire may have contaminated water, so test it before drinking it. Water testing kits are available through Jefferson County Public Health.

RESTORATION TASKS AND NEXT STEPS

As you assess your property, use this worksheet to help develop a plan for restoration tasks that will need to be completed. Some tasks to consider may include but are not limited to, securing the site against further damage, estimating and repairing structural damage, and general cleaning. Depending on the level of damage, assistance of a building or utility professional may be required.

INSURANCE, FINANCE, & IMPORTANT DOCUMENTS

Destructive wildfires can be financially stressful, and even, in some cases, devastating. Having good records organized and stored in a safe location (e.g., safe deposit boxes, digital backups) will make insurance claims, taxes, and filing for financial assistance go smoother down the road. The resources on the following pages can help you work with insurance, finance and funding options, and replace important documents. Here are a few more financial pointers to keep in mind.

- Before beginning any clean-up, restoration, or debris removal, contact your insurance representative to review your policy coverages, set up a timeline for meeting with your adjuster, and determining the best way to document losses. For help finding your insurer or agent, reach out to the Colorado Division of Insurance at **303-894-7490** or visit doi.colorado.gov.
- Take several photos from multiple angles or videos with narration to describe the damage and previous features of your home, personal property, and land. This will help with insurance claims and applications for assistance programs.
- Survivors recommend double checking your phone for old photos to help give you and the insurance company an idea of what possessions have been lost or damaged. For example, if you have a photo from a holiday gathering in your living room last year, you may be able to see items in the background that you can add to your home inventory.
- Keeping track of your receipts from restoration and recovery projects will be important as you work through your insurance claim or apply for assistance programs. Also, look through your email account for any pre-fire purchases to help with valuing items.
- Flood preparedness is a top priority following a wildfire; if possible, flood insurance should be purchased. Visit www.floodsmart.gov to learn more about flood insurance.

Photo credit: Channing Bice, CSU Student

FREQUENTLY ASKED QUESTIONS FOR INSURANCE REPRESENTATIVES

Below is a list of questions that people frequently ask their insurance company following a major loss that you may find useful. Feel free to modify, add, or remove questions for your situation and don't forget to take good notes. Questions adapted from Insurance Institute for Business and Home Safety.

- ☐ **How much is my home (or property) insured for?**
- ☐ **What is covered by my insurance policy and how much is my deductible?**
- ☐ **When should I expect to hear from my adjuster?**
- ☐ **Does my policy cover the replacement value for my home and property?**
- ☐ **What is the best way for me to document damage and start my inventory? Is there a specific template or form I should use?**
- ☐ **Does my policy cover additional living expenses? If so, for how long or is there a spending limit?**
- ☐ **Does my policy include debris removal and clean-up coverage?**
- ☐ **What coverage do I have for my detached buildings (garage, shops, barns)?**
- ☐ **Does my policy help cover the cost of replacing trees, shrubs, and other landscaping?**
- ☐ **Does my policy cover the increased cost of upgrades based on changes in building codes or laws? If so, how much?**
- ☐ **What coverage do I have in case of post-fire flooding? If I don't have coverage, what options do I have?**
- ☐ **Will my homeowners policy or automobile policy pay for vehicles that were parked in my garage and damaged?**
- ☐ **Are there any discounts I qualify for or ways I can decrease my premium?**

CLEANING & DEBRIS MANAGEMENT

After confirming your insurance coverage, scheduling a time to meet with your adjuster, and record any damages or losses, you may be ready to start the clean-up process. Whether damaged or destroyed, you'll want to be familiar with safe clean-up, disposal, and debris management practices. Your needs may vary depending on the extent of the damage and whether you hire contractors or do it yourself. The following pages include resources for the most common clean-up, disposal, and debris management issues that may arise.

Tom Brigham, Pine Gulch Fire survivor, sifts through rubble of his property. Photo credit: Channing Bice, CSU Student

TIPS FOR SAFELY CLEANING FIRE ASH

Debris left behind on Tom Brigham's property from the Pine Gulch Fire.
Photo credit: Kamie Long, CSFS

Resource adapted from Mesa County Sheriff's Office

Ash can be deposited on indoor and outdoor surfaces during and after wildfires and contains trace amounts of cancer-causing chemicals. The ash from trees and vegetation is typically non-toxic; ash from constructions can be contaminated with mercury, asbestos, and lead, making it toxic. Fire ash can irritate skin, especially sensitive skin. Inhaled ash can induce nasal and throat irritation, as well as coughing. Asthma episodes can be triggered by airborne ash. As you begin the clean-up process, keep the following health and safety tips in mind.

- Keep children, pets, and livestock out of burn debris or ash sites.
- Well-fitting N-95 or P-100 masks can help protect during cleanup by blocking more ash particle inhalation than dust or surgical masks.
- When cleaning ash, wear gloves, long-sleeved shirts, and long pants to avoid skin contact. If you, a family member, or pet comes into contact with ash, wash it off as quickly as possible.
- As much as possible, avoid stirring or shifting ash. Before lightly sweeping, mist indoor and outdoor hard surfaces to keep down dust. Follow up with wet mopping or a damp cloth.
- On lightly dusted indoor and outdoor surfaces a damp cloth or wet mop may be all that is needed.
- If available, utilize HEPA filter vacuums instead of shop vacuums or other non-HEPA vacuums. HEPA filter vacuums will filter out minute particles rather than blowing them into the air.
- Food, beverages, or medications that have been exposed to burn debris or ash should not be consumed.
- If you have a vegetable garden or fruit trees, thoroughly wash the produce before eating.
- Clean all utensils and dishware before use by washing them in a strong detergent solution and then soaking them in a bleach solution of one teaspoon of bleach per quart of water for 15 minutes.

CLEANING RESOURCES

Check out the following resources for more information on safe and effective after wildfire clean-up in your home.

Cleaning Up After a Fire Disaster

Utah State University Extension

Visit bit.ly/USUcleanafterfire for more information on cleaning smoke damage, fire retardant, soot, ash, both indoors and outdoors.

Cleaning Up and Removing Smoke Odor

American Red Cross

Check out bit.ly/cleaningsmokeodor for more detailed indoor clean-up advice and cleaning mixtures for removing smoke odor from clothes, walls, and surfaces.

Returning to Your Home Kitchen After Wildfire

CSU Extension

This resource has more information on supplies and considerations for cleaning refrigerators and freezers. Check it out at bit.ly/CSUkitchenafterfire.

Food Safety, Disaster Recovery Guide

Colorado Department of Public Health and Environment

Visit bit.ly/CDPHEfoodsafety for more detailed information on preventing foodborne illness, food safety after power loss and food exposure to wildfire smoke.

DEBRIS AND DISPOSAL RESOURCES

A good place to start is by checking in with your local landfill restrictions for disposing fire debris, hazardous materials, carcasses, and other waste.

Debris Cleanup, Disaster Recovery Guide

Colorado Department of Public Health and Environment

Visit bit.ly/CDPHEdebriscleanup for more information on the safe cleanup of debris, ash, hazardous materials, and emergency livestock disposal.

Asbestos and Natural Disasters Guide

The Mesothelioma Center

Check out asbestos.com/asbestos/natural-disasters for information about materials containing asbestos and how to minimize your exposure after a wildfire.

Animal Carcass Disposal

Colorado Department of Public Health and Environment

This resource has more information on safe carcass disposal and staying in compliance with disposal regulations. Check it out at bit.ly/CDPHEanimalcarcass.

Livestock Mortality Composting Guide

Montana State University Extension

Visit bit.ly/livestockmortality for more information on disposal for large and small operations in semi-arid western regions.

CARING FOR ANIMALS AFTER WILDFIRE

When it is safe to bring your animals back to your property after a disaster, remember to handle them calmly and carefully. They will likely be stressed and confused and may react with unexpected behavior. Keep the following tips in mind:

Livestock:

- When it is safe to do so, check pens, barns, fences, and sheds for damage, and check pastures for debris. Place livestock back into safe areas.
- Check livestock for injuries and tend to minor injuries promptly. Contact a veterinarian for help if your animal has serious injuries, or you suspect smoke inhalation. Smoke and ash can be harmful to animals, so take precautions to protect your livestock from smoke exposure.
- Make sure your animals have plenty of fresh food and water, and cover their food and water when possible to keep ash and other contaminants out.
- Document and report all livestock and poultry losses immediately to your county Farm Service Agency (FSA).

Companion Animals:

- Scent posts and landmarks may have changed, so keep your pets leashed until they have acclimated to your property.
- Check your backyard for any damage to fences and repair before allowing pets to roam free in the yard.
- Be cautious when approaching lost cats or dogs. Stress from a fire, trauma, fear, or injury, can cause a friendly animal to turn aggressive.
- All lost, injured, and deceased companion animals can be reported to Jefferson County Animal Control. Stay on scene if possible until an officer arrives, but if you must leave, provide detailed directions to our office of where the animal was last seen.
- Look for lost and found pets at local animal shelters such as the Foothills Animal Shelter. You can also search for lost pets on Facebook lost and found pet pages. If your pet is missing, file a lost report with Jefferson County Animal Control and the Foothills Animal Shelter.

Further Tips:

- Be mindful of downed power lines and environmental hazards.
- Wild animals will be displaced, so be aware of wildlife on your property and avoid allowing contact with your domestic livestock and pets.
- Make sure any identifiers are left on your animals for at least several days after the fire. (IDs, microchips, tags, brands, etc.)

LANDSCAPE RECOVERY

Following a destructive wildfire, landowners will need to assess the surrounding landscape and determine how best to affect restorative treatments. Immediate concern should be for the stabilization of soils to help prevent or mitigate flooding, erosion, mudslides, and other hazards. Colorado's diverse topography, paired with burn severity of the area can make each landscape treatment plan vary. The following pages contain landscape recovery resources for soil erosion, seeding, trees, and key contacts. Local CSU Extension agents and CSFS foresters can also help provide recommendations.

POST-FIRE FLOODING

Wildfires have increased the risk of flooding in many areas of Colorado in recent years. The dramatic changes in landscape and ground conditions after wildfires increases the risk of flooding during heavy rains. Burned landscape is unable to absorb rain as effectively as it did before the fire, resulting in runoff conditions like those found in parking lots. Flooding is most common during the summer and early fall, when thunderstorms develop during the monsoon season. Rainfall over the burned area collects in streams causing flash floods carrying downed trees, boulders, gravel, and other debris. The resources on the following pages will help landowners downstream understand how to reduce risk and prepare for flooding.

STAY CONNECTED

Every loss and the emotions that come with it matter. It's okay to grieve life prior to the wildfire, mourn what has been lost, feel overwhelmed by the work ahead, and the multitude of other feelings you may experience. Like the wildflowers, you too will grow again in new ways, you may not have thought possible.

Throughout the development of this guidebook, one theme held constant. Amidst the heartbreak, we found ourselves captivated by the resilience of survivors and their land. Although it may feel like all is lost, your connections with family, friends, and the community, will prove to be the most valuable asset to your recovery.

Whether you've known CSU Extension and our partners for awhile or we've just connected, we hope to stay in touch along the way. Don't hesitate to contact us if we can be of further assistance or you're interested in getting involved in community recovery efforts.

You've got this.
